Although the draft was previously anticipated to publish this past May, it seems unlikely at this time that US Fish and Wildlife Service and the National Marine and Fisheries Service will be able to publish this month. As you can imagine there are a lot of factors going into the publishing date at this time, but I hope to get back to you with more information as I receive it.

> We anticipate the draft Biological Opinions (BiOps) created by the services to be released for public comment in May of this year. The services have then agreed to complete final BiOps for chlorpyrifos, malathion, and diazinon by December of 2017. For more information on the BiOps I've attached their website here:
